

SubliJet Solution for the Epson Workforce 30 - PowerDriver Workforce 30

As a replacement for the Epson C120 printer, the Epson Workforce 30 printer is designed for customers who are looking for a fast, cost effective entry level printer for producing sublimation transfers. The Epson Workforce 30 allows the end-user to print up to legal size documents.

Q. How is the PowerDriver Workforce 30 different from the PowerDriver C120 driver?

A. Sawgrass Technologies has developed a new PowerDriver color management profile for the Epson Workforce 30 that provides color output that exceeds that of the previous generation of Epson entry level printers, such as the Epson C120.

Q. Is the driver 64 bit compatible?

A. Yes – the driver is both 32 bit & 64 bit Windows system compatible. Upon installation the driver will auto detect which operating bit system is being utilized and install the correct driver.

Q. What type of ink delivery options will be available?

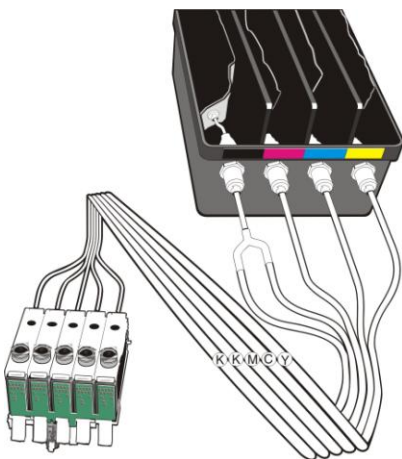

A. Two ink delivery systems are available. A Quick Connect bulk ink system that uses 90 ml ink bags, and individual ink carts. The ink carts will be sold as ‘two-packs’ with two ink cartridges per box.

Q. What is the ink configuration of the PowerDriver Workforce 30 system?

A. The ink configuration is KKM CY (Black, Magenta, Cyan and Yellow). The OEM printer utilizes five ink cartridges (two black). The Sawgrass QuickConnect bulk ink system uses a set of five ink dampers (cartridges) and four bulk ink bags. The black ink bag supplies two of the dampers with black ink.

Ink Configuration- New!

- Workforce 30 printer features a 5 cartridge carriage. Sawgrass has designed an ink configuration that includes three colors (CMY) and two interchangeable black color cartridges (KK).
- The QuickConnect bulk ink delivery system features a damper system with five ink compartments. The first two compartments are designed for black ink and the remaining three are designated for the three colors (CMY).
- Four bags of ink are used in the bulk ink system, with tubing for the black ink splitting and feeding both of the black dampers.

Q. Will I be able to use SubliJet C120 ink refill bags in the Epson Workforce 30 printer?

A. Yes. The Workforce 30 and C120 bulk ink systems utilize the same ink formulations and ink bags.

Q. What type of computer system will I need to get the optimum output?

- A Pentium Dual Core Processor, 3.0 GHz or higher processor is highly recommended.
- 512 MB RAM is the minimum recommended memory however >2 GB RAM or more is recommended to process larger documents with high quality settings.
- >5 GB RAM of free hard drive space is required for proper software and file management
- Works with both 32 bit and 64 bit Windows systems.

Q. What is the major advantage of the PowerDriver Workforce 30 sublimation system?

A. The PowerDriver Workforce 30 sublimation system is a reliable, fast and inexpensive printer solution that offers the cost effectiveness of a bulk ink system and a reliable maintenance-free printer solution.

Q. What paper sizes does the Epson Workforce 30 support?

A. The Epson Workforce 30 can print up to legal size (8.5 x 14 inch) paper.

Q. Who should use the SubliJet solution for the Epson Workforce 30?

A. The Epson Workforce 30 SubliJet Sublimation system should be sold to customers who currently are using an entry-level printer and wish to make an easy and smooth transition to a faster and newer printer or new customers looking to add sublimation to their product mix. The Workforce 30 printer solution is lightweight and easily portable, making it a perfect sublimation printer for custom product designers who take their business directly to the customer, operate mobile Kiosks or businesses that have limited space.

NOTE: For customers who are interested in speed and expanded color gamut, we recommend the Epson 1400 over the Workforce 30. The Workforce 30 solution is slower and offers a more limited color gamut than the Epson 1400 IQ solution. For customers that will print on a more consistent basis and might need the ability to print larger sublimation transfers, the 1400 printer is a better value. However, the Workforce 30 is an excellent starter sublimation system that is portable and easy to use.
